

Architect

Joeb Moore & Partners

Joeb Moore & Partners is an architecture and design firm known for its intellect in design, craftsmanship, inventive formal and spatial systems, and details. The practice specializes in precise and creative buildings, landscapes, and furnishings that sensitively respond to their environment and ecologies of place. We are interested in exploring the interface between the social and physical, between convention and invention. In the broadest sense, the office is committed to the ideal that architecture is a material and social art that cunningly engages with the visual, social and political history and culture of which it is an active part.

Join us if you are an **Architect/Designer** who has:

- Bachelor's or equivalent professional degree in Architecture or related field
